Side Mounted Level Detectors

EX3008-401003-401

is a horizontally mounted, float-operated level detector suitable for plant and OEM applications where open or closed contacts are required to signal presence or absence of liquid at a discrete level. The float extension arm moves a magnet which actuates (deactuates) a hermetically sealed reed detector. Actuation (deactuation) can be reversed by rotating the unit 180 degrees.
